

- ▶ Relevant types: FIGHT GHOST DARK DRAGON ICE ROCK GROUND ELECTR GRASS WATER FIRE STEEL FAIRY
- ▶ Not Relevant types: PSYCHO FLYING POISON BUG NORMAL
- ▶ Pokémons with barred names mean that there are either not still available in the game, or that it is worthwhile to wait a Community Day before evolving it.
- ▶ Moves with symbol † are legacy and unavailable.
- ▶ 🔥 means that the Pokémons can mega-evolve at generation 6.
- ▶ Neutral DPS, Effective Health, and TDO are computated for Pokémons at level 40, with perfect IVs.
- ▶ **Neutral DPS** (Damage per Second) represents how much damage a Pokémon can make in a second. It depends on the Pokémons's attack stat (base ATT + ATT IV) $\times 0.7903$, on the Pokemon's fast and charged moves and on the "Same Type Attack Bonus" (STAB, 25% damage boost of a move when it is the same type as one of the types of the Pokémons using the move). They define the damages and the necessary energy for realising the damages.

DPS \leq 12.5	not an attacker
12.5 < DPS \leq 16	a good attacker (but privilege ATT IV = 15, and level up to 35)
DPS $>$ 16	excellent attacker

- ▶ The **Effective Health (EH)** is computed via the formula:

$$EH = (\text{base DEF} + \text{DEF IV}) \times (\text{base HP} + \text{HP IV}) \times \frac{0.7903^2}{900}$$

EH \leq 25	very fragile
25 < EH \leq 30	fragile but viable
30 < EH \leq 35	bulky
EH $>$ 35	very bulky

- ▶ **TDO** (Total Damage Output) represents how much damage a Pokémon can make before it faints. It is computed via the formula: $TDO = DPS \times EH$.
- ▶ Useful resources

▶ Base Statistics

▶ Base Statistics for generations 5 to 7

▶ Comprehensive DPS/TDO spreadsheet

▶ Raid simulator
