Raid EX

Raid boss difficulty (generations 1 and 2)

Estimator for the minimal number of players with the best counters at level 30, with "best friends" boost, and extreme weather. Raid bosses are considered to have their worst attack (WA). All bosses are tier 5 (they have 15000 HP), except Mewtwo which has 22500 HP.

- If boss raid has only simple weakness: minimal number of players = $\text{ceil}(\text{Base DEF}/80)$
- If boss raid has only double weakness: minimal number of players = $\text{ceil}(\text{Base DEF}/108)$

These formula do not take the base ATT into account, that influences the number of deaths and indirectly the number of deaths

Remarks

Best Fire type Pokémon (better than Moltres). Excellent Dragon

Best Electric type Pokémon (although it has the ice weakness). Excellent Dragon.

Excellent flying type Pokémon depending on its moves

Will not have flying type moves. As Electric type Pokemon, it is as Electivire (with the ice weakness).

Will not have flying type moves. Could be an excellent ground Pokémon
