Current and future raid bosses

High Probability

Possible with Low Probability

Very Low Probability

Raid EX

Raid boss difficulty (generations 1 and 2)

Estimator for the minimal number of players with the best counters at level 30, with "best friends" boost, and extreme weather. Raid bosses are considered to have their worst attack (WA). All bosses are tier 5 (they have 15000 HP), except Mewtwo which has 22500 HP.

- If boss raid has only simple weakness: minimal number of players = $\text{ceil}(\text{Base DEF}/80)$
- If boss raid has only double weakness: minimal number of players = $\text{ceil}(\text{Base DEF}/108)$

These formula do not take the base ATT into account, that influences the number of deaths and indirectly the number of deaths

| | Articuno | Zapdos | Moltres | Mewtwo |

Raid boss difficulty (generation 5)

- Base statistics are computed using the same formula as for previous generation Pokémon.
- Moves remain unknown, but could be guessed based on the game on Game Boy. Remarks are based on these potential predictions.

Remarks Excellent flying type
Pokémon depending on
its moves

Will not have flying
type moves. As Elec-
tric type Pokemon, it is
as Electivire (with the
ice weakness).

Will not have flying
type moves. Could
be an excellent ground
Pokémon
