Current and future raid bosses

High Probability

Possible with Low Probability

Very Low Probability

Raid EX

# Raid boss difficulty (generations 1 and 2)

Estimator for the minimal number of players with the best counters at level 30, with "best friends" boost, and extreme weather. Raid bosses are considered to have their worst attack (WA). All bosses are tier 5 (they have 15000 HP), except Mewtwo which has 22500 HP.

- If boss raid has only simple weakness: minimal number of players =  $\text{ceil}(\text{Base DEF}/80)$
- If boss raid has only double weakness: minimal number of players =  $\text{ceil}(\text{Base DEF}/108)$

These formula do not take the base ATT into account, that influences the number of deaths and indirectly the number of deaths

	Articuno	Zapdos	Moltres	Mewtwo
Base ATT	192	253	251	300

### Weaknesses

ICE ELECTRIC ROCK

ICE ROCK

ICE WATER

Remarks Excellent flying type  
Pokémon depending on  
its moves

Will not have flying  
type moves. As Elec-  
tric type Pokemon, it is  
as Electivire (with the  
ice weakness).

Will not have flying  
type moves. Could  
be an excellent ground  
Pokémon
