- Pokémons with barred names mean that there are either not still not available in the game, or that it is worthwhile to wait a Community Day before evolving it.
- Moves with symbol † are legacy and unavailable.
- 🌎 means that the Pokémon can mega-evolve at generation 6.
- Neutral DPS, Effective Health, and TDO are computed for Pokémons at level 40, with perfect IVs.
- **Neutral DPS** (Damage per Second) represents how much damage a Pokémon can make in a second. It depends on:
 - the Pokémon's attack stat at level 40 ($\text{base ATK} + \text{ATK IV}) \times 0.7903$,
 - the Pokémon's fast and charge moves: they define the damage and the necessary energy for realising the damage. The fast move generates energy used to launch the charge move.
 - the "Same Type Attack Bonus" (STAB), a 20% damage boost of a move when it is the same type as one of the types of the Pokémon using the move).

- The **Effective Health** (EH) defines the bulkiness of a Pokémon. At level 40, it is computed via the formula:

$$\text{EH} = (\text{base DEF} + \text{DEF IV}) \times (\text{base HP} + \text{HP IV}) \times \frac{0.7903^2}{900}$$

- **TDO** (Total Damage Output) represents how much damage a Pokémon can make before it faints. It is computed via the formula:

$$\text{TDO} = \text{DPS} \times \text{EH}$$
